Professional Summary

Front-end Developer with over 3 years of industry experience and 3 years of academic project work, specializing in building modern, responsive web applications using Nuxt.js, Vue.js, Vuetify, Tailwind CSS, and JavaScript. Currently pursuing a Master's degree in Computer Architecture with research focused on Federated Learning and Blockchain technologies. Combines strong technical expertise with research-driven thinking to deliver high-quality user interfaces and performance-optimized solutions. Proven ability to collaborate in cross-functional teams, understand business needs, and translate them into elegant, scalable frontend experiences. Actively seeking Front-end Development roles to contribute to impactful, user-centered digital products.

Work Experience

- **Dornatech - Tabriz , Iran** Apr 2022 - Present
Co-founder/Frontend Developer

- + Designed and developed Dornatech.ir using Nuxt.js and Tailwind CSS, delivering a fast, SEO-friendly company website with a responsive user interface
- + Built the frontend of Merkato24.com, an e-commerce platform, with Vue.js and Vuetify, focusing on performance, accessibility, and intuitive navigation

- **Freelancer - Tabriz , Iran** Apr 2022 - Present
Frontend Developer

- + Designed and implemented the 3x-ui panel manager using Nuxt.js and Tailwind CSS, enabling efficient user access control and server configuration
- + Built the frontend of the Danayan crowdfunding platform with Vue.js and Vuetify, providing a seamless experience for investors and project owners
- + Developed the Zarin crowd investment interface with modern Vue components, focusing on clean UI and responsive layout
- + Maintained and enhanced the Award Maven portal by fixing UI bugs, optimizing load performance, and ensuring cross-browser compatibility
- + Developed a progressive web app (PWA) for an online consulting platform, integrating it with Flutter WebView for hybrid mobile use
